Dear Taniki san,

**Tsunami disaster Environment cleaning campaign using with E.M technology (Jan: 19th 20<sup>th</sup> 21<sup>st</sup> 2005)**

Tsunami disasters gave very big Damages to our country down south costal area. Our Lanka Sekai Kyusei foundation(L.S.K.F) took leading roles to cleaning environment free from foul dour flies, though use E.M we did 3 days cleaning camping in down south worst damage are name call Hambantota L.S.K.F members voluntarily gave there support to do this mass camping succeed also government city council health officers request form us control this foul odour. So they gave to us some area to spray E.M one of medium size lagoon. In side this lagoon many floating garbage's hidden dead bodies. We start this cleaning program 3 week gone after tsunami but that time also very bad smell after 3 days hard job foul odour control. Not only lagoon we have to spray E.M city garbage area drainages too. So I give my warm thanks to Apnan technical officer Mr. Kosaburo Imamura who is informed me and arranged facilities for took E.M free of change from Sarwodaya foundation. Also I give my warm thanks to our Sri Lanka APNAN coordinator Mr.Taniki san and can't forget another person who is Dr.Krishnarathna he gave me wonderful help through technical assistance preparing E.M solution.

Forward I hope to send you our L.S.K.F Kyusei nature farming expanding work shop photos I wish day by day APNAN activities be come prosperous then we can make better world.

Thank you  
Your faithfully

Kelum P. Weerasinghe.  
(Kyusei nature farming division)

Kingsly Kariyawasam  
(Vice president)

1) Camp site L.S.K.F. 3 days in disaster area.

2) A lagoon full of garbage & inside this dead bodies. Spreading surround bad smell.
